# Skills

- Skilled with Ruby language and relevant tech stack.

  - Web framework
  - Test framework
  - User Authentication and Authorization
  - Database
  - Network Request
  - Async Queue
  - Deployment

- Web development service and tools

  - Skilled with Git
  - Skilled with Linux and MaxOS, iTerm + Tmux + Vim
  - Skilled with front-end development, HTML, Javascript, CSS

- Familiar with MongoDB, MySQL, Redis
- Familiar with Nginx

- Solid knowledge of Data Structure and Algorithm.

- Solid knowledge of code refactoring, performance optimizing, design pattens, network and OO programming.

## Self-Summary

- I'm an enthusiastic and diligent staff. Work hard to make job done, and also think hard to keep efficiency. I won the only "Best Staff 2015" in my team.
- Technically, my goal is to go deep in Web development. Focusing on Ruby and Rails as a breakpoint, and learning all the other interesting topics in Web.
- Personally, always remind myself to be a humble learner, with a little patience and a lot of desire.
